receipt (inter alia containing time and date of receipt) for the same. If that specified date happens to be a closed holiday for the purchaser, the bids will be received up to the appointed time on the next working day. If the **Schedule of Requirements** provides for receipt of bids through “tender Box” the bids shall be submitted accordingly as per the instruction given in the **Schedule of Requirements**.

The purchaser may at its discretion, extend this deadline for the submission of bids by amending the bidding documents in accordance with ITB clause 6 in which case all rights and obligations of the purchaser and bidders previously subject to the deadline will thereafter be subject to the deadline as extended.

24 **Preliminary examination of bids-unresponsive, substantially responsive bids**

- 24.1 The purchaser will examine the bids to determine whether they are complete, whether the required bid validity is available whether any computational errors have been made whether required bid security has been furnished, whether the documents have been properly signed and whether the bids

- are generally in order. While examining the bids the purchaser will also keep in view the requirements as per ITB clause 8.
- 24.2 Arithmetical errors, if any in a bid will be rectified on the following basis. If there is a discrepancy between the unit price and the total price that is obtained by multiplying the unit price and quantity, the unit price shall prevail and the total price shall be corrected accordingly. If there is a discrepancy between the words and figures, the amount in words shall prevail if the supplier does not accept the correction of such errors its bid will be rejected.
- 24.3 Prior to the detailed evaluation pursuant to ITB clause 26, the purchaser will determine the substantial responsiveness of each bid to the bidding documents. A substantially responsive bid is one which conforms to all the requirements and terms and conditions of the bidding document including the specification and technical parameters of the goods as projected in the bidding document without material deviations. Deviations from or objections or reservations to the bidding documents critical provisions such as those concerning bid validity technical specification performance security warranty obligations, Force Majeure, taxes & duties and applicable law (governing the contract) will be deemed to be material deviations. Bids from an agent without proper authorization from the manufacturer as per ITB clause 13.2(a), shall be treated as non-responsive.
- The purchaser's determination of a bid's responsiveness is to be based on the contents of the bid itself without recourse to extrinsic evidence.
- 24.4 The purchaser may waive any minor infirmity, non-conformity or irregularity in a bid, which does not constitute a material deviation provided such waiver does not prejudice or affect the relative ranking of any bidder.
- 24.5 The conclusion drawn by the purchaser as to the substantial responsiveness or otherwise of a bid or consideration of a minor infirmity or non-conformity or irregularity in a bid is final.
- 24.6 If a bid is determined as not substantially responsive, it will be rejected by the purchaser and may not subsequently be made responsive by the bidder by correction of the non-conformity.
- 25 **Conversion to single currency**
- 25.1 To facilitate evaluation and comparison of bids the purchaser will convert all bid prices expressed in the amount in various currencies in which the bid prices are payable to Indian rupees at the BC selling market rate of exchange established by the State Bank of India for similar transactions as on the date of bid opening.
- 26 **Evaluation and Comparison of bids**
- 26.1 The purchaser will evaluate and compare the bids which have been determined to be substantially responsive pursuant to ITB clause 24 for each schedule separately. The bid for a schedule will not be considered if the complete requirements covered in the schedule is not included in the bid. However as stated in ITB clause 10 bidders are allowed the option to bid for anyone or more schedule and to offer discounts for combined schedules. These discounts will be taken into account in the evaluation of the bids so as to determine the bid or combinations of bids offering the lowest evaluated cost for the purchaser in deciding award (Security deposit for P.O.L.) for each schedule.
- 26.2 The comparison shall be on CIP destination basis, duly delivered and commissioned (as the case may be) at the destination.

### **COASTAL SURVEY FOR DEMARCATION OF SUITABLE SITES FOR MARICULTURE IN INDIA**

The Central Marine Fisheries Research Institute (CMFRI) under the All India Network Project on Mariculture, has proposed to undertake survey of the Indian coastline to select suitable sites based on various criteria for mariculture and coastal farming. It is envisaged to demarcate potential sites initially at 3 locations in sea (2 locations in East Coast at Ramanathapuram District in Tamil Nadu and 1 location in West Coast at Uttara Kannada District in Karnataka) for sea cage culture activities along coastline of India during the 12<sup>th</sup> Plan period.

A preliminary reconnaissance survey with available maps and such inputs should be carried out to zero down on suitable areas. Thereafter primary & secondary data collection plan should be laid out and executed to achieve the objective of site selection. This involves collection and analyzing of data on bathymetry, currents, wave height, environment quality, carrying capacity, climate, SST, population of fishing communities, hinterland connectivity etc. All the data shall be stored and analysed in a GIS for identification/demarcation of suitable sites based on various criteria for mariculture and coastal farming. GIS provides tools that can store volumes of data, link them, and use tools like weighted overlay analysis to perform an optimal site selection, transportation network analysis, etc.

The work involved in the programme has been divided into three sub components:-

#### **1. Training of Enumerators**

Enumerators identified by the CMFRI have to be trained at start of project by the survey firm on primary data collection and compilation in a format suitable for capturing spatio-temporal data & for GIS analysis.

#### **2. Primary Data set collection survey**

- Bathymetry – as points/grid which will represent a minimum ground resolution of 20 m.
- Hydrography – depth wise as well as XY spread as point or interpolated surfaces with a minimum ground XY resolution of 50 m and depth resolution of 5 m.
  - Current velocity data & Tides, Wind & Significant Wave height, Substrate, Carrying capacity
  - Temperature & salinity, pH, turbidity, Dissolved oxygen, COD, Pesticides, Heavy metals, Chlorine, Inorganic nitrogen, Total inorganic phosphorous,
- Markets demand supply data – Settlement location Latitude/Longitude with demand value, Locations with infrastructure for processing & deep freeze storage of fish produce.

### **3. Secondary data collection, data integration in GIS and GIS analysis**

- Climate – available as / Grid on Temperature, precipitation
- SST – Satellite image analysis output gridded data
- Road and Rail network, district and village boundaries geo-referenced to GCS WGS 1984
- Population – Fisher folk community population linked to village boundary
- Local Map scale: 1:10,000 for marine area, Regional Map scale: 1:50,000 for land area
- Ranking and weightage of layers and criteria based weighted overlay for site selection  
Reclassify the output to select suitable sites. This may be beneficial not only to explore the best locations identified by the model but to also investigate the second and third most favourable sites.

#### **Work Plan (please refer flow chart below):**

- CMFRI will identify the suitable enumerators and venue for conducting training
- CMFRI will specify the exact locations in East and West Coast for undertaking the bathymetric survey
- Survey area in square kilometres for primary data collection survey will be intimated for each location.

#### **Expected outcome:-**

- All the project data in softcopy has to be handed over to CMFRI.
- Data so submitted should be compatible in Free & Open Source software 'QGIS' to be used by CMFRI to visualize this data
- The final output of the analysis should be provided as maps for potential sites in 3 locations in PNG format to be disseminated on CMFRI website.
- Training to scientists and technical staff of CMFRI on GPS, GIS, Remote Sensing and Digital Image Processing.
